

Kutlass[®] LX500

Latex Coated Glove

Product Datasheet

OUR REF: Kutlass[®] LX500

PRODUCT DESCRIPTION

A specialised blend of advanced yarns provide cut level 5 protection in a lightweight, highly versatile glove. The incorporation of spandex vastly increases comfort and fit. Flexible crinkle **latex coating** provides superb dexterity and grip for demanding applications. The breathable liner reduces perspiration and works in conjunction with the **Sanitized[®] hygiene function** to provide a fresh, comfortable and odour free experience throughout extended usage.

TYPICAL APPLICATIONS

Light sheet metal assembly, manufacturing, handling sharp objects, demolition, general duty tasks requiring high cut protection.

AVAILABLE SIZES: 7/S • 8/M • 9/L • 10/XL
• 11/2XL

PACKAGING: Per Pack: 10 pairs

Per Box: 120 pairs

Technical Details

Tested in accordance with EN 388, EC type examination carried out by:

SATRA Quality Assurance Ltd, SATRA Technology Centre, Wyndham Way, Telford Way, Kettering, Northamptonshire, NN16 8SD, United Kingdom (Notified Body No. 0321)

The results are taken from the palm area of the gloves and the un-coated surface may have reduced performance levels.

EN 388

3 5 4 2

► **The Sanitized[®] hygiene function** brings increased freshness, comfort and protection.

WARNING!

► Please Note that these gloves contain natural rubber latex which may produce an allergic reaction in some individuals. If affected please discontinue use immediately and seek medical advice. Users with known sensitivity to rubber or latex products should avoid contact.

- **Sanitized[®]:** These gloves incorporate a Biocidal product. The Biocidal treatment protects against a broad spectrum of Bacteria and Fungi. The active Biocidal substance - Zinc Pyrithione - promotes freshness and inhibits odours.
- **Storage:** Gloves should be stored in a cool, dry environment in the original packaging and out of direct sunlight.
- **Maintenance:** Both new and old gloves should be thoroughly inspected before use to ensure no damage is present. Gloves should not be left in a contaminated condition if reuse is intended - if contaminated, gloves should be cleaned as far as possible
