Mechanical data tested in accordance with

EN 388: 2003

Abrasion Resistance	Level 1
Cut Resistance	Level 5
Tear Resistance	Level 4
Puncture Resistance	Level 1

All EC type examinations were carried out by

SGS UK Ltd.

Unit 202B, Worle Parkway, Weston-Super-Mare,
Somerset UK, BS22 6WA
(Notified Body No.01 20)

CLEANING I MAINTENANCE

Both new and used sleeves should be thoroughly inspected before being worn to ensure n damage is present. Sleeves should not be left in contaminated condition if reuse is intended in which case sleeves should be cleaned as far a possible.

STORAGE

Sleeves should be ideally stored in dry conditions in original packaging.

OBSOLESCENCE

When stored as recommended will not suffer change in mechanical properties for up to three years from the date of manufacture. Service life cannot be specified and depends on the application and it is the responsibility of the end user to ascertain suitability of the product for its intended use.

GENERAL

None of the materials or processes used in the manufacture of these products is known to be harmful to the wearer.

PLEASE NOTE

The results of the physical tests should help in sleeve selection, however it must be understood that actual conditions of use cannot be simulated and it is the responsibility of the end user and not the manufacturer to determine sleeve suitability for the intended use.
