

Kevlar Sleeves

KEVLAR® SAFETY SLEEVES USER INFORMATION

SLEEVE DESCRIPTION

The sleeves are made from 100% kevlar® yarn and will withstand abrasion in dry handling conditions. The sleeves assist in ventilation and comfort. Not for use with liquids. Should not be worn where there is a risk of entanglement with moving machinery. NOT suitable for contact with a naked flame.

MARKING

 , STYLE, SIZE AND 

Sleeve 26 cm (10")	KS-10
Sleeve 36 cm (14")	KS-14
Sleeve 46 cm (18")	KS-18
Sleeve 56 cm (22")	KS-22

The above are designed to fit for special purpose and sleeve size measurements are made when the sleeve is laid flat and relaxed.

INTERMEDIATE Safety Category

1343 X1XXXX

Mechanical test data in accordance with EN 388:2003

Abrasion Resistance	Level 1
Cut Resistance	Level 3
Tear Resistance	Level 4
Puncture Resistance	Level 3

Mechanical test data in accordance with EN 407:2004

Burning behaviour	Level X
Contact heat	Level 1
Convective heat	Level X
Radiant heat	Level X
Small splashes of molten heat	Level X
Large quantities of molten heat	Level X

All EC type examinations were carried out by

SGS UK Ltd. Unit 202B, Worle Parkway,
Weston-Super-Mare, Somerset, UK, BS22 6WA
(Notified Body No. 0120)

CLEANING & MAINTENANCE

Both new and used sleeves should be thoroughly inspected before being worn to ensure n damage is present. Sleeves should not be left in contaminated condition if reuse is intended in which case sleeves should be cleaned as far a possible.

WARNING

Chlorine bleach can cause strength loss on Kevlar® at low concentrations. Do not use in or around chlorine bleach.

STORAGE

Sleeves should be ideally stored in dry conditions in original package.

OBsolescence

When stored as recommended will not suffer change in mechanical properties for up to three years from the date of manufacture. Service life cannot be specified and depends on the application and responsibility of user to ascertain suitability of the sleeve for its intended use.

GENERAL

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer.

PLEASE NOTE

The results of the physical tests should help in sleeve selection, however it must be understood that actual conditions of use cannot be simulated and it is the responsibility of the end user and not the manufacturer to determine sleeve suitability for the intended use.
