

RH2258

Heavyweight chemical resistant 22 inch red PVC gauntlet.

Specially formulated PVC gauntlet to give superior resistance to chemicals. Individually pressure tested for complete wearer confidence and reassurance. Heavyweight, heavy duty gauntlet for demanding applications. Soft cotton interlock liner works in conjunction with the Sanitized® hygiene function to ensure prolonged freshness, hygiene and odour repellence. Flared gauntlet style for ease of removal. Fully REACH compliant and Phthalate free formulation. Available in 18" and 22" versions

FEATURES AND TECHNOLOGY

- CHEMICAL PROTECTION
- SANITIZED®
- EXTRA LONG
- PHthalate FREE
- WATERPROOF
- PVC

TYPICAL INDUSTRIES

- MANUFACTURING/AUTOMOTIVE
- OIL, GAS & MINING
- AGRICULTURE
- JANITORIAL
- PESTICIDES

I Ethyl Acetate	T Formaldehyde (37%)

* Testing carried out on the palm material. Except in cases where the glove is equal to or over 400mm - where the cuff is tested also tested. * X denotes Not Tested * Where applicable, EN388:2016 scores take precedent and are ongoing. There is no correlation between couple test levels and ISO 15997 /TDM cut test levels. Where both EN388:2016 and EN388:2003 scores are shown, the latter is shown for informational purposes only.

FURTHER INFORMATION

STORAGE / TRANSPORT: Keep away from direct sunlight; store in a cool dry place. Keep away from ozone sources or naked flame. Store the gloves in their original packaging. During transportation, ensure the product is well packaged and protected in order to prevent any damage.

PRECAUTIONS BEFORE USE: 1. Gloves should not be used when there is a risk of entanglement with moving machine parts. 2. Before usage and periodically during usage, inspect the gloves for any defects or imperfections. Avoid wearing damaged, dirty or worn out gloves. 3. The gloves should not come in contact with a naked flame or fire. 4. Do not subject to high speed or serrated blades. 5. Always read enclosed user instructions before using these gloves. 6. When used, protective gloves may provide less resistance to the dangerous chemicals due to changes in physical properties. 7. Movements, snagging, rubbing, de-gradation caused by the chemical contact etc. may reduce the actual use time significantly. For corrosive chemicals, degradation can be the most important factor to consider in selection of chemical resistant gloves. 9. This product has not been tested against viruses.

CONSTITUENTS / ALLERGIES: Some gloves may contain ingredients which are known to be a possible cause of allergies in sensitive persons who may develop irritant and/or allergic contact reactions. If an allergic reaction should occur seek medical advice immediately. This model does not contain any substances at levels that are known to, or suspected to, adversely affect user hygiene or health.

*SANITIZED® TREATMENT

Sanitized®: These gloves incorporate a Biocidal product. The Biocidal treatment protects against a broad spectrum of Bacteria and Fungi. The active Biocidal substance - Zinc Pyrithione - promotes freshness and inhibits odours.
