Unigloves' Unicare Latex gloves are lightly powdered, single use gloves. Designed for care and cleaning use, Unicare Latex gloves offer maximum dexterity, sensitivity and comfort compared to nitrile and vinyl.

- 🔗 Lightly powdered with cornstarch to aid donning and doffing.
- 🔗 Natural latex offers excellent barrier protection for situations involving infectious material.
- 🔗 Manufactured with a full palm and finger texture. A textured surface offers a more secure grip, especially when working in wet conditions.
- 🔗 Unigloves takes additional steps in the manufacture of its gloves to ensure the highest standards of protection are achieved.

Usage

Care and cleaning, non-sterile protective usage. For use in handling of material to prevent cross-contamination.

Quantities

100 gloves per dispenser
10 dispensers per case
