

## Wash and care instructions

These wash and care instructions are for mechanical gloves and forearm protectors of the following product families:

### *Cut protection:*

uvex C500 series  
uvex C300 series  
uvex unidur series  
uvex protector series

### *Simple mechanical protection:*

uvex rubipor series: ergo and XS  
uvex profi series: ergo and XG  
uvex contact series  
uvex phynomic series  
uvex unipur series: 6630, 6631, 6634, MD, carbon

### First-time use:

Gloves must be checked thoroughly before first use. It must be ensured that the gloves have no damages (e. g. incisions, holes). Faulty or damaged must not be used.

### Cleaning:

Whether and how often a glove is allowed to be cleaned, heavily depends on the abrasion and the wearing rate of the glove. Gloves with heavy abrasion or damages have to be disposed of.

One or more cleaning cycles could take place, if a proper condition of the glove is ensured.

Do not use any chemicals or sharp-edged objects for cleaning the gloves (wire brushes, abrasive paper).

Appropriate cleaning as follows:

### Re-use:

The proper condition of the glove has to be checked again after the cleaning process. Heavy worn or damaged gloves must not be used anymore.

The UVEX SAFETY Gloves GmbH & Co. KG do not assume liability for any change of power levels (EN 388) as a result of cleaning.

### Disposal:

With proper handling, the gloves may be disposed of as normal household waste. In case of contact with chemicals, please note the disposal instructions of the chemical manufacturer.
